

Welcome to the MBA program!

As an assignment in MBA 603, you will be required to complete a tentative long-term plan. Please see the notes below that will help you get started, and I will be able to respond to additional questions you may have.

To get started on your plan:

- Please use the [Projected Schedule](#) located in student resources, as directed by your instructor, to help determine when to schedule your courses. You will note in the upper portion of the schedule, 8-week sessions are indicated with check marks indicating which session the course is offered. The lower portion indicates when the full semester electives are offered. The [MBA Checksheet](#) also has color coded course pairings that will help.
[Projected Schedule](#)
[MBA Checksheet](#)
- You can use the projected schedule for subsequent years as well. Spring 2022 can be used for Spring 2023, Spring 2024, and so on. The same goes for Summer and Fall, as well.
- Use a Word document or Excel spreadsheet to **indicate which session in each semester** you intend to complete each required course. Also, be sure to list semesters in **chronological order** for ease in registration each term. Please note that electives are not typically offered every semester. Do not schedule all your courses in the same session, as this would defeat the purpose of having two sessions to balance out your schedule.
- **Summer is not two sessions**, it is one term that runs all of June and July.
- **Electives are full semester courses**, not 8-week sessions. Be sure to note when these courses are offered. A good scenario would be a full semester course, paired with a course in the first 8-week session, and another course in the second 8-week session. I would put your tougher course in the first 8-week session.
- Be sure to **schedule MG 630 toward the end of the program**. In my opinion, this is the most time-consuming course that requires the most teamwork. The prerequisite for this course is 15 hours plus AC 642 or FI 632.
- If you are using **Financial Aid**, requirement is a minimum of 5 hours per semester. To receive the maximum amount allowed, you must be registered in both 8-week sessions or *at least* one 8-week session plus a full semester course. If you only enroll in ***one*** 8-week session for 5 hours, your loan must be reduced.
- **Keep a copy** of your approved long-term plan for reference when semester registration opens up. If for some reason you have not followed the plan, make sure revisions are made for future semesters.

Submit your long-term plan to me as an attachment to an email and I will respond with revisions or approval for your assignment.

I look forward to working with you!

Ms. Lillian Akin | [256.765.4154](tel:256.765.4154)
