OUR MISSION

The UNA Career Center is committed to empowering students and alumni in all phases of their career development. In support of this mission, the Career Center serves as the primary resource on campus for career related information, providing necessary resources, services, and programs to facilitate successful career development as it relates to students, alumni, faculty, and employers.

Over the last year, the Career Center has been challenged to define ‘student success’ as it relates to our mission. Student success in career development is demonstrated when students exhibit confidence and self-efficacy in choosing and pursuing a profession, achieve the necessary skills to search and apply for jobs, and display resilience and tolerance in a changing vocational landscape.

Thank you for your continued partnership and support of our students as they make their way into their chosen career fields.

Fall 2019 Events

We look forward to seeing you on campus this year at one or more of our recruiting events. We are continuing to see success in offering our discipline specific events and hope you have benefited from speaking with students whose interests and goals align closely with those of your organization.

Event registration is now live on LionJobs and on our website (una.edu/career).
Experiential Learning

The 2018-2019 academic year saw over 150 UNA students participating in internships and we hope to continue to see those numbers and those experiences increase. Together with the College of Business, the Career Center is expanding our Experiential Learning opportunities to include externships. The purpose of an externship is to let students see the day-to-day routines of professionals working in their areas of interest in a low risk environment. Our internships will continue to give students long term, hands-on experiences while our externships provide short term shadowing opportunities to help guide our students as they make their major and career choices.
