

# Importing Instructions for the Kodak PixPro SPZ1

**1. Create a folder on your computer or your flash drive to save your video clips in.**

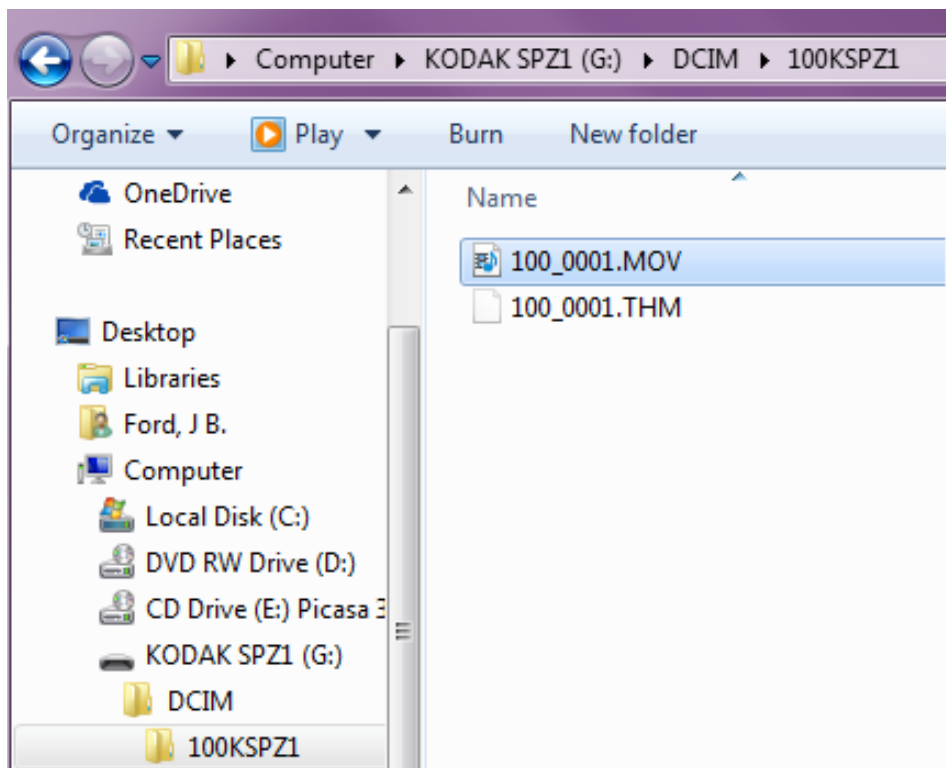

Right click in the location you want to create your folder, mouse over “New,” and click on “Folder.” Give the folder a name.

**2. Connect the Kodak PixPro camera to the computer via the USB cable found in the camera kit.**

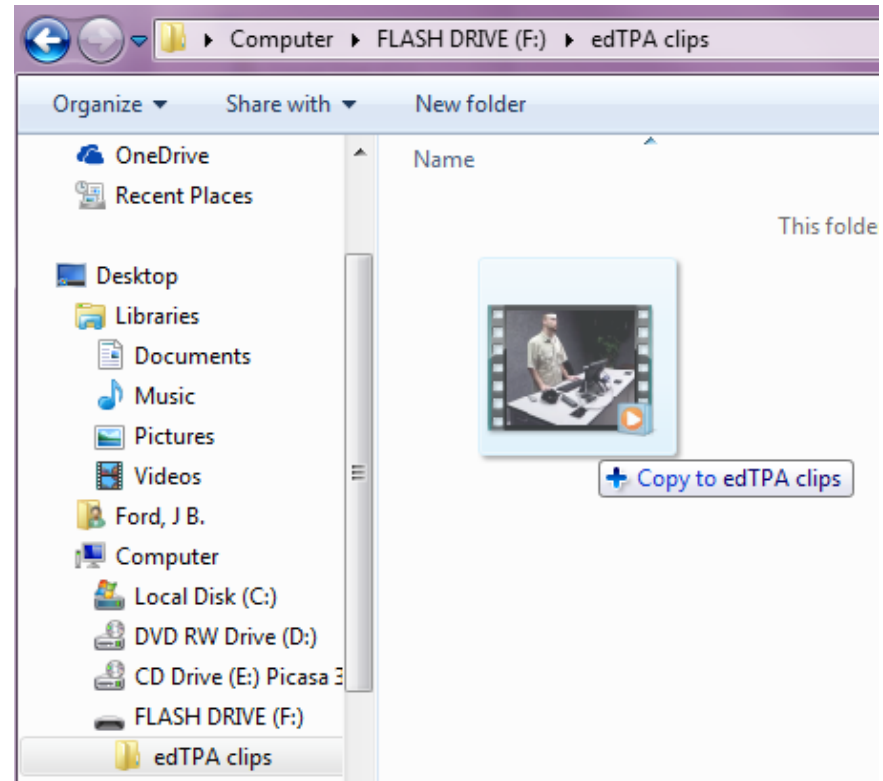

**3. The Kodak camera should appear as a Hard drive under "Computer."**

Click on the DCIM folder to access your video files. Click on the folders within to find the desired video clip. Your video clip will be in a .mov format.

**4. Left click and drag your video file to folder you have created.**

After your video files have copied to your folder, eject the Kodak PixPro to verify that the file still plays.
