Blue Cross contracts with a full range of healthcare providers across the state to ensure members have access to the providers they need. The verification of healthcare provider credentials is an integral part of adding providers to Blue Cross and Blue Shield network. It helps ensure that our members have access to quality care. We evaluate provider qualifications when making a decision about their participation in our networks. However, we do not use quality, member experience or cost related measures in these decisions.

This report will show a maximum of 200 available results.

The information displayed in our directory is collected during the credentialing process and then again every three years during recredentialing. Some provider information is updated more frequently, such as demographic information when a provider no longer accepts new patients, moves from one location to another or changes office telephone numbers. Every effort is made to keep the provider directory current. Providers are contacted and asked to update their demographic information each quarter.
