

# Faculty, Staff & Student Guide for Connecting a Samsung Galaxy to Campus Wireless

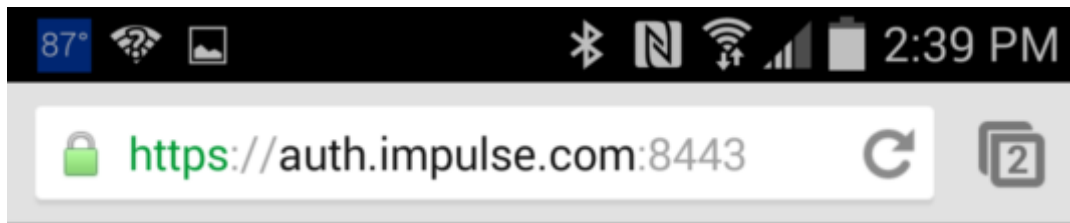

1. In your list of available wireless networks, select **UNA Start Here**.

2. Select **Connect**.

3. If you are not automatically redirected to the screen below, open a web browser and select **Employee/Student**.

University of  
NORTH ALABAMA

## Welcome to the UNA Wireless Network

To set up network and Internet access, please choose your user type and login.

Employee/Student

Employees/Students with valid credentials will be moved to a secure wireless network and will receive full network access. In order to properly and securely access all necessary resources, all employees and students needing wireless access should utilize this network.

New Guest

Guests will receive restricted Internet-only network access as some on campus resources will not be available from the guest wireless network. Also, the guest network's speeds are limited in order to accommodate the main campus network and the broadest number of possible users.

Returning Guest

Login to your existing guest account or request your password to be resent.

4. In the "Step 1:" drop-down box, select **Local Server**. Select **Download**.

University of  
NORTH ALABAMA

Welcome to the configuration and connection technology for UNA WiFi. Click to get started.

The following system was detected:

**Step 1:** Please select a download source and install App.

Local Server ▾ Download

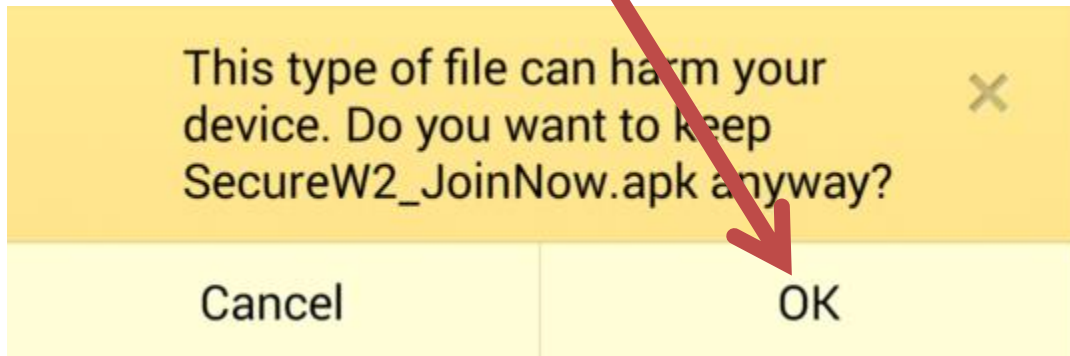

To allow "Local Server" App install the on your device, you may need to goto "Settings" and select either "Security" or "Applications". Turn on "Allow installation of non-market apps".

**Step 2:** Return to this page to **connect** by selecting JoinNow below.

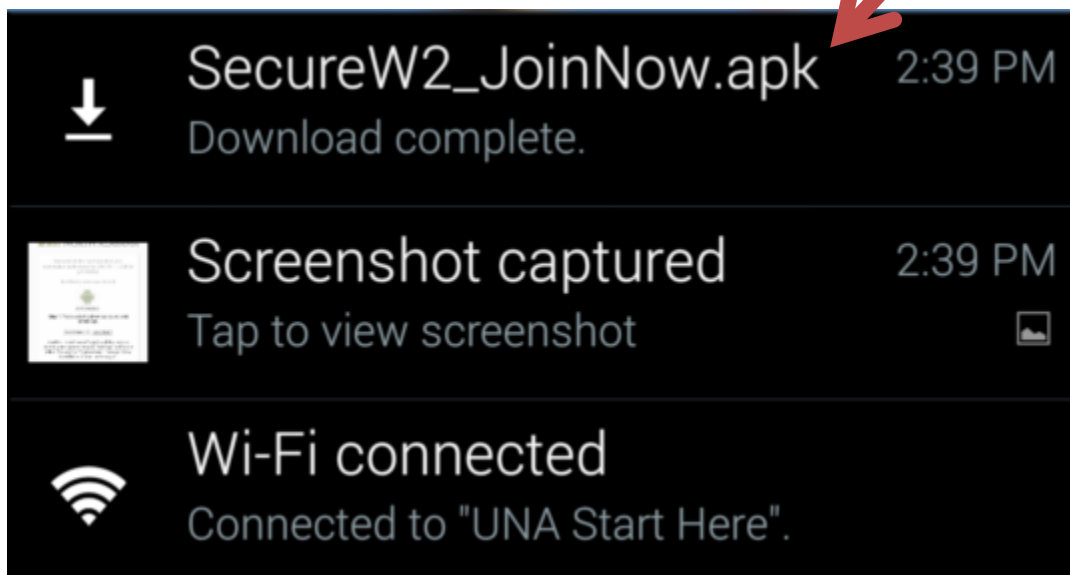

JoinNow

Note: if clicking the **JoinNow** button does not open the App, please use Android's built-in browser or Chrome browser

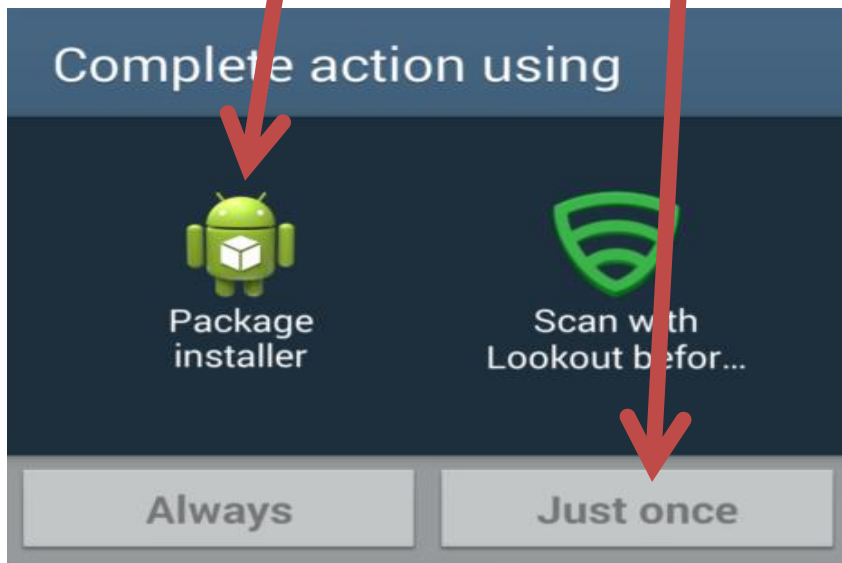

5. If you receive this message, select **OK**.

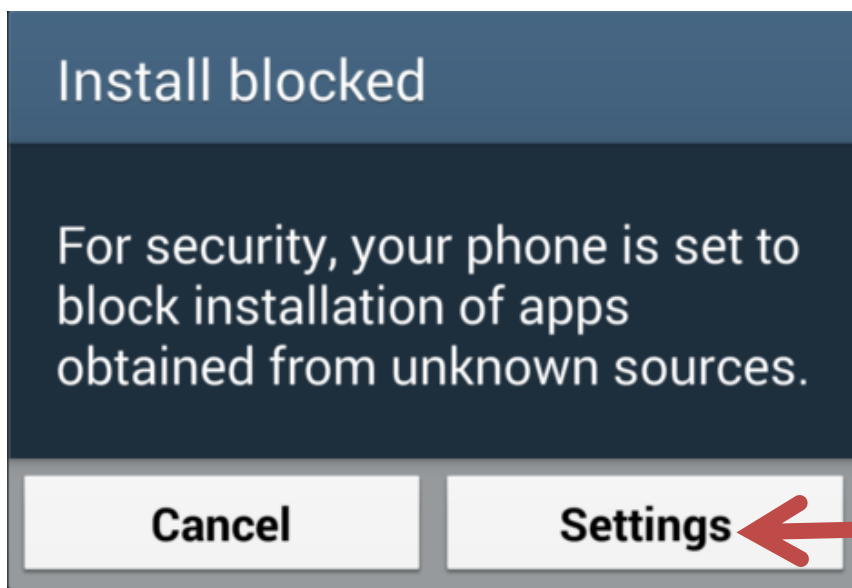

6. Locate and run the downloaded application **SecureW2\_JoinNow.apk**.

7. Select **Package Installer**, then select **Just once**.

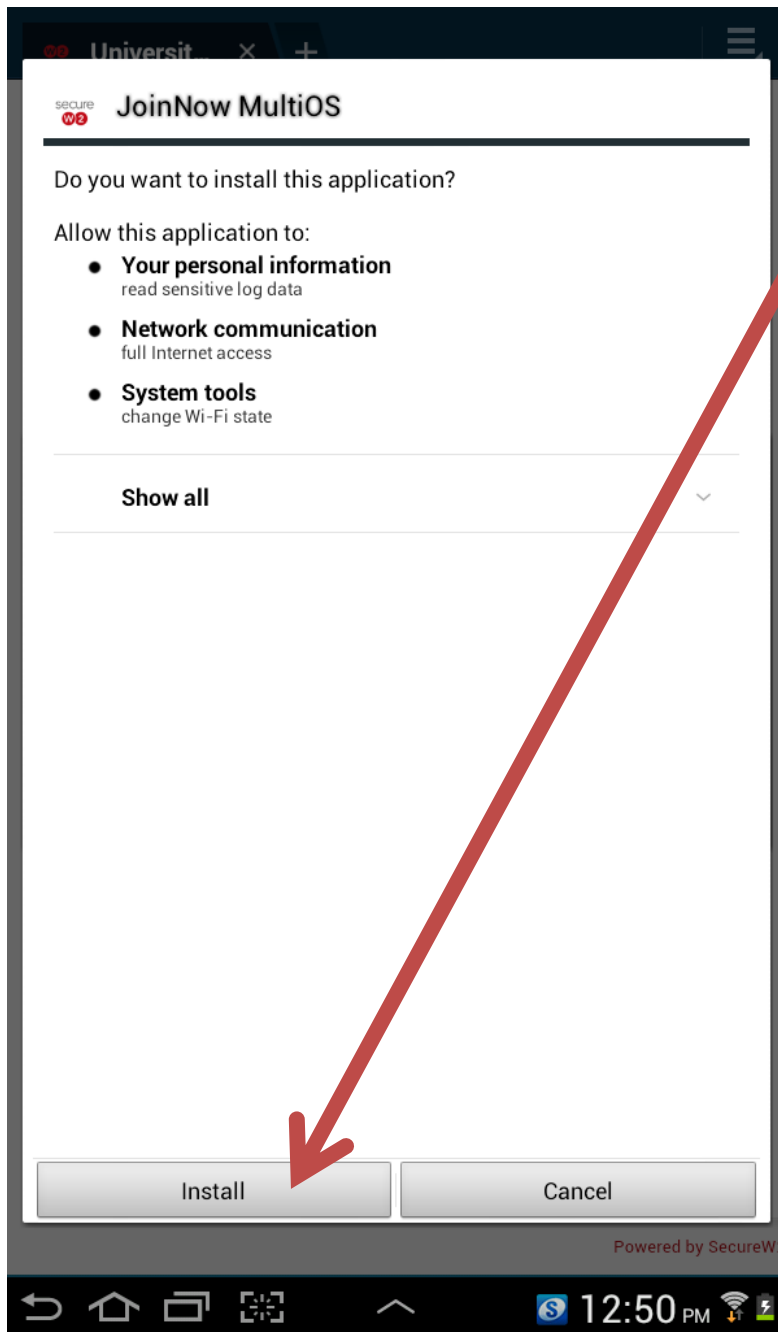

8. If you receive the following security message, select Settings → Security Settings → Device Administration → check the box next to “**Allow installation of apps from sources other than the Play Store**” or “**Unknown Sources**”.

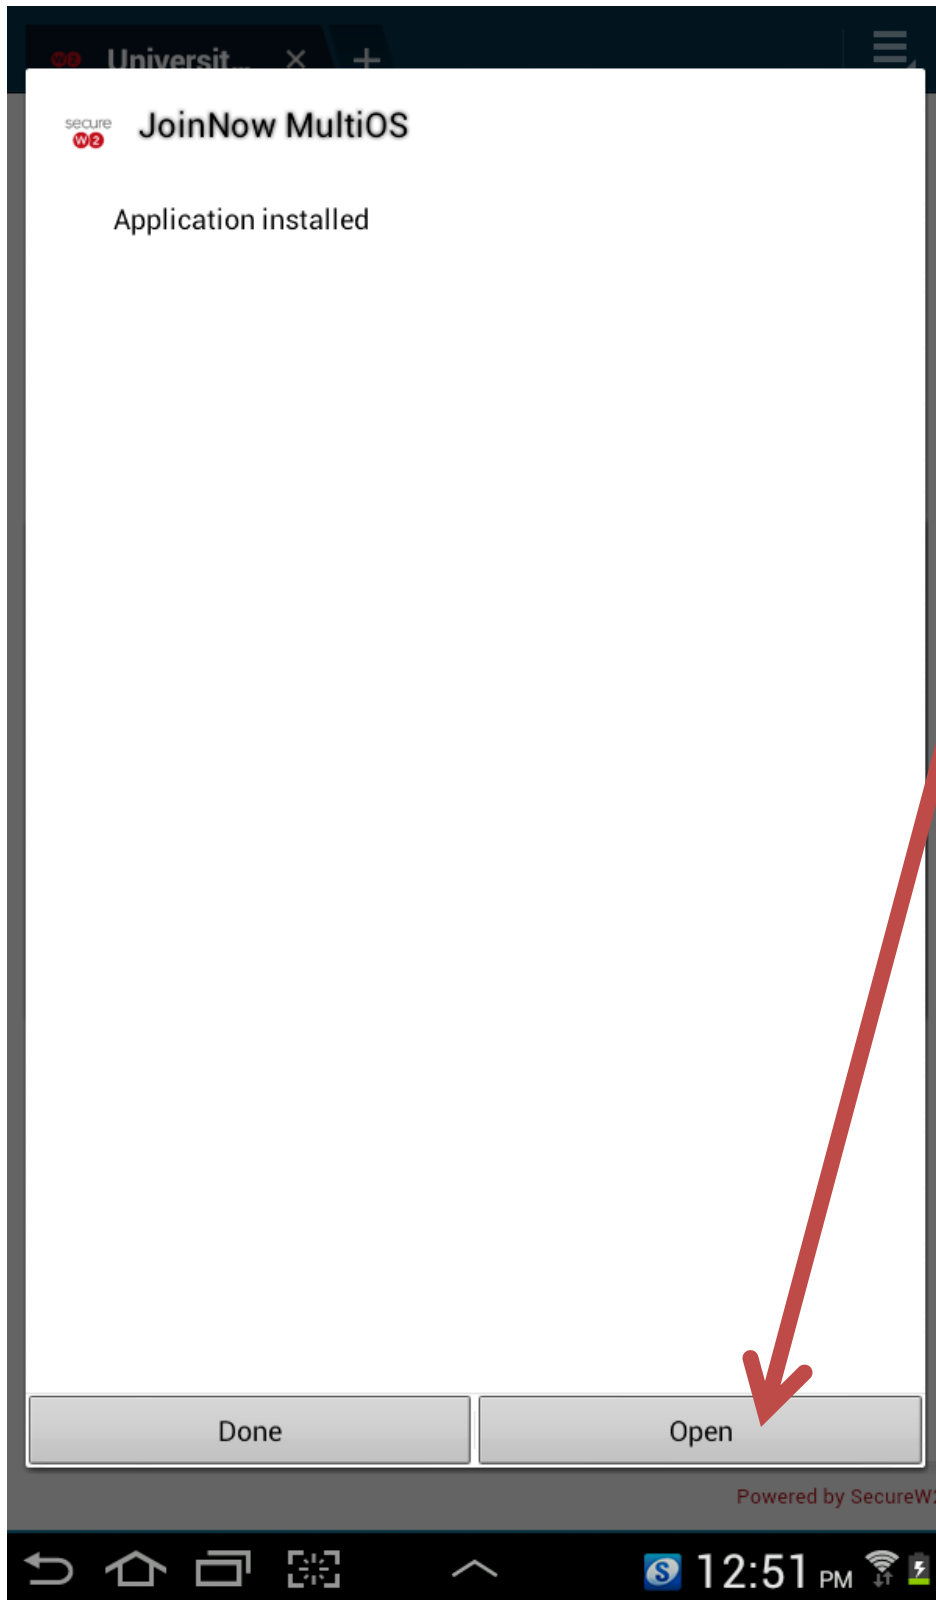

**\*\*\* Note: After you complete this process and are connected to the wireless network, you may want to undo this Security setting to allow installation of apps from Unknown sources. \*\*\***

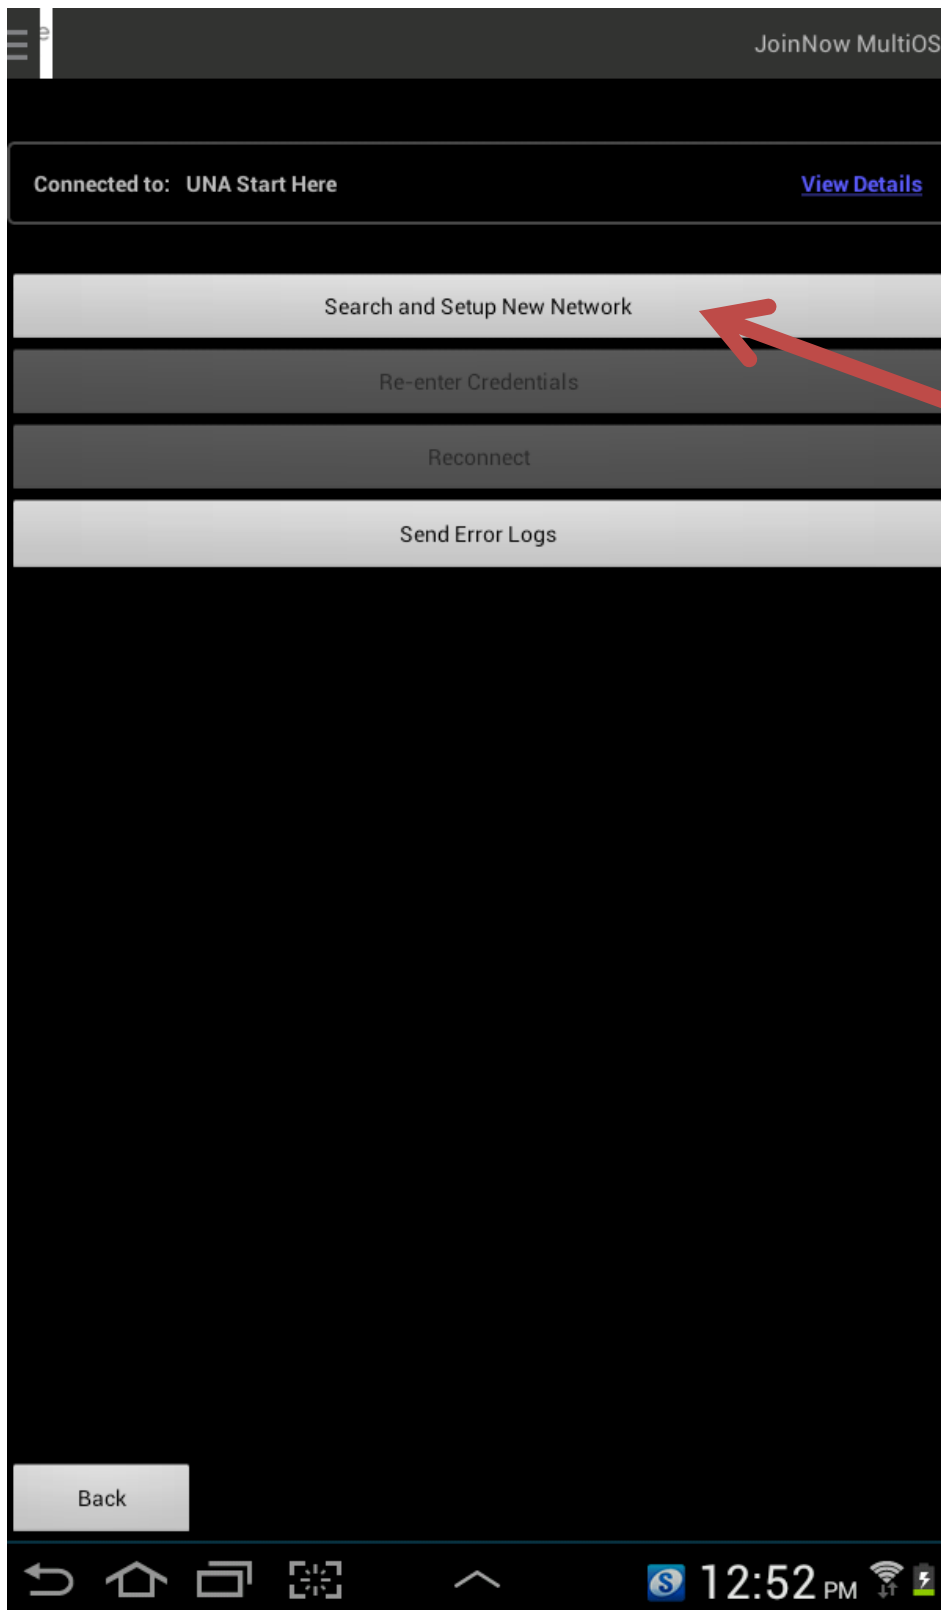

9. Return to Downloads and open the package. Select **Install**.

10. Select **Open**.

11. Select **Search and Setup New Network**.

12. In the Domain: field, enter **una.edu**.
