Proposal for Undergraduate Directed Research (UDR)

UDR Course: MA 295, MA 395, MA 495 Number of credit hours 1, 2, 3
Student's Research Plan: (Must include a research report and presentation)
I plan to continue my work with Dr. Stenger to explore the growth rates of rehabilitated squirrels. I have recently developed a BMI index to allow volunteers working in rehab centers to quickly determine if their squirrel is in a healthy weight range.
I have been accepted for presentation at NCUR2014 in Lexington. I will also complete an 6-10 page research paper describing my work so far. I will submit this to NCUR and one other publication.
I will attend the weekly meeting of the UDR team.
