THE
PROGRAM

CodeAlabama is a 90 -hour (8-week) workforce training initiative offered through the University of North Alabama's Center for Learning and Professional Development. Students who complete this program will possess a fundamental understanding of programming concepts, get exposure and hands-on experience with two popular programming languages, and begin to acquire skills necessary to become contributing members of a software development team.

4 MODULES

- Module 1: Fundamental programming concepts, problem-solvingtechniques, and introduction to coding using Python programming language.

- Module 2: Intermediate programming concepts, building functional applications with Python.

- Module 3: Continuation of software development and problem-solving fundamentals, introduction to the C++ programming language.

- Module 4: Intermediate programming techniques using C++, development of more complex real-world projects.
