This manual outlines the entire physical defense program for reference and continuous personal growth. The RAD System of Physical Defense is currently being taught at many Colleges and Universities. The growing, widespread acceptance of this system is primarily due to the ease, simplicity and effectiveness of our tactics, solid research, and unique teaching methodology. The RAD Systems is dedicated to teaching women defensive concepts and techniques against various types of assault, by utilizing
easy, effective and proven self-defense tactics. Our system of realistic defense will provide a woman with the knowledge to make an educated decision about resistance.
