CAAP Critical Thinking Test - Fall 2006

Test Description from ACT

The CAAP Critical Thinking test measures students skills in clarifying, analyzing, evaluating, and extending arguments. An argument is defined as a sequence of statements that includes a claim that one of the statements, the conclusion, follows from the other statements. Each passage in the test presents a series of sub-arguments in support of a more general conclusion or conclusions. A variety of formats are used: case studies, debates, dialogues, overlapping positions, statistical arguments, experimental results, and editorials. About 60% of the test focuses on the analysis of the elements of an argument, with about 20% covering each of the other two areas.
