

University of North Alabama

Athletics Advising and Registration

- NCAA Rules require a student-athlete to earn 24 hours and maintain a cumulative 2.0 GPA to retain eligibility
- Student-athletes must earn at least nine hours per semester in order to retain eligibility for the next semester
- After a Student-athlete has met with their academic advisor the athletic department will meet with them to assist with registration. Also, if a student-athlete is on a check sheet (have declared a major) the hours that a student takes must meet the requirements of the check sheet. NCAA Legislation requires a student who is beginning their fifth full-time semester to declare a major.
- Many times courses are advised to benefit the student in their career. That is fine, as long as the student meets the required number of hours for eligibility.
- It is important to know the catalog year the student is under when advising or a change will need to be made in the catalog year if requirements have changed for a particular major

If you have questions regarding our student-athletes please contact:
